Subject: Region 8 PES

Hi Keith,

This is a heads up.

Last week I mentioned that we were working with Region 8 to push some Gold King Mine samples the CLP. The samples are for ICP-AES, MS and Hg. We have suggested to Region 8 that they consider using PES.

At this point, we haven't heard to when they will be shipping samples through CLP or if they will use PES.

But, should they decide to use them, ASB will try and make it easy for them- perhaps with shipping them directly to the laboratory.

We made the offer, and now we will wait.

Just wanted to give you a heads up that we may need your assistance with this.

Thanks,

Shari
